Patent No.: 7,107,251

Issue Date: Sep. 12, 2006

For: METHOD OF EVALUATING THE QUALITY OF AUDIO-VISUAL SEQUENCES

REQUEST FOR CORRECTED CERTIFICATE OF CORRECTION

Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

A certificate of correction was issued for this patent on April 10, 2007. Applicant hereby requests issuance of a corrected Certificate of Correction pursuant to 37 CFR 1.322 as shown on the attached form PTO-1050. The correction requested herein is the result of a Patent Office printing mistake.

The second item on the Certificate of Correction dated April 10, 2007 is incorrect.

"training sets EA" should read "training sets EAj", not "ESj" as printed. A copy of the original Request for Certificate of Correction as filed is attached to support this correction.

Accordingly, issuance of the corrected certificate is respectfully requested.

Since the error was a result of a Patent Office oversight, no fee is required, however, please charge any fee deficiency or credit any overpayment to Deposit Account No. 50-1088.

Respectfully requested,
CLARK & BRODY

- 4...OBJECTIVE RATING
- 5...SUBJECTIVE RATINGS

(57) Abstract: The invention concerns a method for evaluating the quality of audio-visual sequences by: a training comprising the attribution of a subjective rating to each of N_0 training sequences exhibiting degradations identified by a training vector assigned to each sequence according to a first vectoring process, to constitute a database consisting of N_0 training vectors MO_i and subjective ratings NS_i ; classifying the training vectors into k classes of ratings based on the subjective ratings NS_i which have been attributed, to form k training sets whereto are attributed k significant ratings; establishing for said audio-visual sequence to be evaluated a vector according to said first vectoring process; attributing to the audio-visual sequence the significant training rating NSR_j , corresponding to the closest training set Ea_j .

WO 01/01705 A1

[Suite sur la page suivante]

ABSTRACT

The invention provides a method of evaluating the quality of an audiovisual sequence by:

- 5 a) training, comprising allocating a subjective score NS_i to each of N_0 training sequences S_i (where $i = 1, 2, \dots, N_0$) presenting degradations identified by a training vector MO_i which is given to each sequence S_i in application of a first vectorizing method, in order to
10 build up a database of N_0 training vectors MO_i with subjective scores NS_i ;
- b) classifying the N_0 training vectors MO_i into k classes of scores as a function of the subjective scores NS_i that have been allocated to them, so as to form k
15 training sets EA_j (where $j = 1, 2, \dots, k$) which have k significant training scores NSR_j allocated thereto;
- c) for each audiovisual sequence to be evaluated, generating a vector MO using said first vectorization method; and
20 d) allocating to the audiovisual sequence for evaluation the significant training score NSR_j that corresponds to the closest training set EA_j .
